IT Corporate Upgrade

"Committed to Service Beyond Expectations"

GARNER, North Carolina --- January 4, 2010 --- Today, Green Resource initiates their new accounting and finance platform at their Triangle distribution center. Ben Holcomb, the company's Chief Financial Officer, explains, "Due to organic sales growth and last year's asset acquisition of GroGreen Solutions, LLC, we needed to upgrade our information technology. The owners invested more than \$100,000 into this project. After an exhaustive Best-In-Class search, we ultimately contracted with Nitor Solutions (Clayton, NC) to equip and configure the hardware and BroadPoint Technologies (Raleigh, NC) to assist us with software implementation. We have consolidated four databases into one master database and sophisticated operating system. Our intent is to rollout the information technology to our corporate office and remaining distributions centers during the next three months."

NITORSOLUTIONS

Nitor Solutions is customer focused on virtual infrastructure, development services, remote support, software license renewal, and purpose-built IT solutions that improve communication, increase collaboration and reduce operating costs. Our unique engagement model is designed to limit the risks associated with adopting advanced technology architectures and to enhance business impact.

BroadPoint Technologies is a business consulting firm that helps organizations manage their financial operations and business processes for greater success. We aid companies in solving complex business challenges with smart technology solutions based on quality thinking, extensive business expertise and innovative problem-solving. We partner with Microsoft, Oracle, and ASI to deliver standard and custom technology solutions that enhance business performance. While BroadPoint is proficient across all markets, we have exceptional expertise in government agencies, associations, and Not-for-Profit organizations. BroadPoint serves 400+ clients in 31 states and 6 countries from their Washington, D.C. metro area headquarters, and two regional offices in Virginia Beach, VA and Raleigh, NC.
