

SEED

Great turf originates from high-quality seed. Green Resource supplies and wholesales turf, erosion, and native seeds to customers in the southeast. We have our own seed blenders and have made custom seed blends/mixtures for landscapers, dealers, and seeding contractors for over 25 years.

ORIGIN

Green Resource visits with growers and inspects fields in the Willamette Valley of the Pacific Northwest and other regions of the United States and Canada with a heritage of growing high-quality seed.

Our product managers also rely upon local data from the National Turfgrass Evaluation Program (NTEP) to recommend seed cultivars ideally situated for your specific agronomic zone, climate, soil type, and shade conditions.

COOL-SEASON

- **Ryegrass**
 - Annual
 - Perennial
 - Intermediate
